The Directors submit their report together with the audited annual financial statements for the year ended 31 December 2022, which disclose the state of affairs and performance of Industrial Development Corporation Limited (the "Company"or "IDC").

1 PRINCIPAL ACTIVITIES

The Company is an investment holding company for the State-Owned Enterprises (SOE) and is wholly owned by the Government of the Republic of Zambia through the Minister of Finance pursuant to the Minister of Finance (Incorporation) Act Cap 349 of the Laws of Zambia. The Company's mandate is to play a catalytic role in deepening and supporting Zambia's industrialization capacity to support job creation and domestic wealth formation across key economic sectors. The Company plays its role through co-investing alongside private sector investors. Simultaneously, the Company serves as an investment holding company for previously state-owned enterprises and acquisition of new investments in priority sectors. Sources of financing and revenue include dividend income, equity disposals, bank borrowings and debt issuance in the capital market. Profits generated by the company are reinvested to fund new projects or advanced as shareholder loans to its subsidiaries and paid out to its shareholder, the Minister of Finance, as dividends.

2 SHARE CAPITAL AND BENEFICIAL OWNERSHIP INFORMATION

The authorised share capital of the Company is **K1,500 billion** (2021:K20.00 milllion) comprising **1,500,000,000** (2021:20,000,000) ordinary shares at a par value of **K1.00** (2021: K1.00) each. The issued and fully paid-up share capital remained at **K1,500 billion** (2021: K10 million) comprising **1,500,000,000** (2021:10,000,000) ordinary shares at a par value of **K1.00** (2021 :K1.00) each.

The Company shareholding is represented as follows:

Name of shareholder	**Percentage of shareholding**

Mr Cornwell Muleya	Industrial Development Corporation Ltd (Appointed 11.10.23)	Executive Director

During the year, the total Directors' remuneration was **K3.59 million** (2021: K4.37 million) , comprised of **K2.13 million** (2021: K3.55 million) for services rendered by Executive Directors , and **K1.46 million** (2021: K0.82 million) for services rendered by Non - Executive Directors.

7 INTERESTS REGISTER INFORMATION

During the year, the Company officers (Directors, Company Secretary or Executive Officers of the Company) did not declare any interest in the Company's transactions and business (2021: nil).

The interests' register, as required by the Companies Act, 2017 of Zambia, that should contain particulars of the interests declared, is available for inspection at the Company's registered office.

8 AVERAGE NUMBER OF EMPLOYEES AND REMUNERATION

The total remuneration for employees during the year amounted to **K98.32 million** (2021:K86.67 million) and the average number of employees were less than **100** (2021: less than 100)

9 HEALTH , SAFETY AND ENVIRONMENT ISSUES

The Company has policies and procedures to safeguard the occupational health, safety, and welfare of its employees.

10 GIFTS AND DONATIONS

During the year, the Company made donations amounting to **K0.01 million** to charitable organisations and events (2021: K0.67 million).

11 RESEARCH AND DEVELOPMENT

The Company did not incur any costs on research and development during the year (2021: nil).

12 PROPERTY , PLANT AND EQUIPMENT

During the year, the Company purchased property, plant and equipment amounting to **K3.92 million** (2021: K8.42 million). In the opinion of the Directors, the carrying value of property, plant and equipment is not more than their recoverable value.

13 SOCIAL RESPONSIBILITY

The Company is committed to supporting various activities and sectors across Zambia in line with its overall mandate of promoting, supporting, and facilitating job creation.

14 LEGAL MATTERS

There are no significant or material legal or arbitration proceedings to the knowledge of the Directors, any such proceedings which are pending or threatened, by or against the Company which may have or have had during the year immediately preceding the date of this document a significant effect on the financial position or profitability of the company.

15 COMPANY AUDITOR AND REMUNERATION

The Auditors, Grant Thornton, have indicated their willingness to continue in office and a resolution for their reappointment will be proposed at the next annual general meeting.

The Auditor's remuneration for the year was **K2.42** million (2021: K2.32 million) as regards audit services rendered to the Company.

Signed on behalf of the Board of Directors

Industrial Development Corporation Limited
Statement of Directors' responsibilities
For the year ended 31 December 2022

The Companies Act, 2017 of Zambia requires the Directors to prepare annual financial statements for each financial year that give a true and fair view of the state of affairs of the Company as at the end of the financial year and of its financial performance. It also requires the Directors to ensure that the Company keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Company. They are also responsible for safeguarding the assets of the Company. The Directors are further required to ensure the Company adheres to the corporate governance principles or practices contained in Part VII's Sections 82 to 122 of the Companies Act, 2017 of Zambia.

The Directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable estimates, in conformity with IFRS Accounting Standards and the requirements of the Companies Act, 2017 of Zambia.

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of annual financial statements, and for such internal controls as the Directors determine necessary to enable the preparation of annual financial statements that are free from material misstatement whether due to fraud or error.

The Directors are of the opinion that the annual financial statements set out on pages 10 to 72 give a true and fair view of the state of the financial affairs of the Company and of its financial performance in accordance with IFRS Accounting Standards and the requirements of the Companies Act, 2017 of Zambia. The Directors further report that they have implemented and further adhered to the corporate governance principles or practices contained in Part VII's Sections 82 to 122 of the Companies Act, 2017 of Zambia.

Nothing has come to the attention of the Directors to indicate that the Company will not remain a going concern for at least twelve months from the date of these annual financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF INDUSTRIAL DEVELOPMENT CORPORATION LIMITED

Report on the audit of the separate financial statements

Opinion

We have audited the financial statements of Industrial Development Corporation Limited ("the Company") set out on pages 10 to 72, which comprise the statement of financial position as at 31 December 2022, and the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements present fairly, in all material respects, the financial position of Industrial Development Corporation Limited as at 31 December 2022, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of Industrial Development Corporation Limited in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) together with ethical requirements that are relevant to our audit of the financial statements in Zambia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information
The Board are responsible for the other information. The other information comprises the Board's Report as required by the Companies Act of 2017, which we obtained prior to the date of this auditors' report. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance or conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements
Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatements, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements, or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements
In our opinion, the financial statements of Industrial Development Corporation Limited as of 31 December 2022 have been properly prepared in accordance with the Companies Act, 2017 and the accounting and other records and registers have been properly kept in accordance with the Acts.

The Zambia Companies Act of 2017 requires that in carrying out our audit of the Company, we report on whether:

i. There is a relationship, interest or debt which us, as the Company's auditor, have in the Company; and
ii. There are serious breaches by the Company's directors, of corporate governance principles or practices contained in part VII's sections 82 to 122 of the Zambia Companies Act of 2017.

In respect of the foregoing requirements, we have no matter to report.

Notes to the annual financial statements

1 General information

The Company is an investment holding company for the State-Owned Enterprises (SOE) and is wholly owned by the Government of the Republic of Zambia through the Minister of Finance pursuant to the Minister of Finance (Incorporation) Act Cap 349 of the Laws of Zambia. The Company's mandate is to play a catalytic role in deepening and supporting Zambia's industrialization capacity to support job creation and domestic wealth formation across key economic sectors.

The Company plays its role through co-investing alongside private sector investors. Simultaneously, the Company serves as an investment holding company for previously state-owned enterprises and acquisition of new investments in priority sectors. Sources of financing and revenue include dividend income, equity disposals, bank borrowings and debt issuance in the capital market. Profits generated by the company are reinvested to fund new projects or advanced as shareholder loans to its subsidiaries and paid out to its shareholder, the Minister of Finance, as dividends.

The Company is domiciled in Zambia and the address of its registered office is:

P.O Box 37232,
61 Independence Avenue Prospect Hill.
Lusaka.
Zambia.

2 Summary of material accounting policies

The principal accounting policies applied in the preparation of these annual financial statements are set out below.These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

The financial statements of Industrial Development Corporation Zambia Limited have been prepared in accordance with IFRS Accounting Standards and interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to entities reporting under IFRS and the Zambia Companies Act. The financial statements comply with IFRS Accounting Standards.

In accordance with the requirements of the Companies Act of Zambia, the financial statements for the year ended 31 December 2022 have been approved for issue by the Directors. The measurement basis applied is the historical cost basis, except where otherwise stated in the accounting policies below. The financial statements are presented in Zambia Kwacha ("K"). The functional currency of the Company is the Zambian Kwacha rounded to the nearest thousand.

The preparation of financial statements in conformity with IFRS Accounting Standards requires the use of certain critical accounting estimates. It also requires the directors to exercise judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or where assumptions and estimates are significant to the financial statements, are disclosed in Note 3.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.2 Changes in accounting policy and disclosures

A number of new or amended standards became applicable for the current reporting period and these include the following standards.

- Amendment to IAS 1 'Presentation of Financial Statements' on Classification of Liabilities as Current or Non-current.

- Amendments to IAS 37 'Provisions, Contingent Liabilities and Contingent Assets' on Onerous Contracts—Cost of Fulfilling a Contract.

- Annual improvements cycle 2018 -2020.

The Directors do not expect that the adoption of the Standards will have a material impact on the financial statements of the Company in future periods, except as noted below:

Number	Effective date	Executive summary
Amendment to IAS 1 'Presentation of Financial Statements' on Classification of Liabilities as Current or Non-current .	Annual periods beginning on or after 1 January 2022 (Published January,2020)	The amendment clarifies that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by expectations of the entity or events after the reporting date (for example, the receipt of a waiver or a breach of covenant).
Amendments to IAS 16 'Property, Plant and Equipment' on Proceeds before Intended Use	Annual periods beginning on or after 1 January 2022. (Published May, 2020).	The amendment to IAS 16 prohibits an entity from deducting from the cost of an item of PPE any proceeds received from selling items produced while the entity is preparing the asset for its intended use (for example, the proceeds from selling samples produced when testing a machine to see if it is functioning properly). The proceeds from selling such items, together with the costs of producing them, are recognised in profit or loss.
Amendments to IAS 37 'Provisions, Contingent Liabilities and Contingent Assets' on Onerous Contracts—Cost of Fulfilling a Contract	Annual periods beginning on or after 1 January 2022 (Published May 2020)	The amendment clarifies which costs an entity includes in assessing whether a contract will be loss-making. This assessment is made by considering unavoidable costs, which are the lower of the net cost of exiting the contract and the costs to fulfil the contract. The amendment clarifies the meaning of 'costs to fulfil a contract'. Under the amendment, costs to fulfil a contract include incremental costs and the allocation of other costs that relate directly to fulfilling the contract.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.2 Changes in accounting policy and disclosures (continued)

(ii) New standards and interpretations not yet adopted (continued)

At the date of authorisation of these financial statements, the Company has not applied the following new and revised IFRS Standards that have been issued but are not yet effective.

Number	Effective date	Executive summary
Amendments to IAS 12, Income Taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction.	Annual periods beginning on or after 1 January 2023. (Published May 2021)	The amendments require companies to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences.
Narrow scope amendments to IAS 1 'Presentation of Financial Statements', Practice statement 2 and IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors'	Annual periods beginning on or after 1 January 2023. (Published February 2021)	The amendments aim to improve accounting policy disclosures and to help users of the financial statements to distinguish changes in accounting policies from changes in accounting estimates.
Amendments to IAS 1 - Non-current liabilities with covenants.	Annual periods beginning on or after 1 January 2024 (Published January 2020 and November 2022)	These amendments clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability. The amendments also aim to improve information an entity provides related to liabilities subject to these conditions.

2.3 Investment in projects and other entities

i) Investment in projects

Investments in projects are classified as fair value through profit or loss. They are initially recognised at cost. Subsequently they are measured at fair value, with gains and losses arising from changes in fair value recognised in profit or loss. There is no subsequent reclassification of fair value gains and losses to profit or loss following the recognition of the investment.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.4 Investment in projects and other entities (continued)

ii) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Company has control. The Company controls an entity where the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. They are deconsolidated from the date that control ceases. The acquisition method of accounting is used to account for business combinations by the Company and these are accounted for at cost less accumulated impairment.

iii) Associates

Associates are all entities over which the Company has significant influence but not control or joint control. This is generally the case where the Company holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting after initially being recognised at fair value.

2.5 Foreign currency translation

(a) Functional and presentation currency

Items included in the annual financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The functional currency and presentation currency of the Company is the Zambian Kwacha (K).

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuations where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

2.6 Revenue

Investment income

Investment income is accounted for on an accruals basis and relates to interest from Government bonds, bank interest earned and rental income from investment properties.

Dividend income from investments is recognised when the shareholder's right to receive payment has been established.

Rental income from investment property is recognised in the income statement on a straight-line basis over the term of the lease.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.6 Revenue (continued)

Leases for which the Company is a lessor are classified as either finance leases or operating leases. A lease is classified as a finance lease if it transfers substantially all of the risks and rewards incidental to ownership of an underlying asset. All other leases are classified as operating leases. Lease classification is made at inception and is only reassessed if there is a lease modification.

Revenue represents the net invoice value of services provided to third parties after deducting discounts, volume rebates, outgoing sales taxes and duties, and is recognised when control is transferred to the customers.

2.7 Financial instruments

Financial assets and financial liabilities are recognised in the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and measurement

Financial assets

It is the Company's policy to initially recognise financial assets at fair value plus transaction costs, except in the case of financial assets recorded at fair value through profit or loss (FVTPL) which are expensed in profit or loss.

Classification and subsequent measurement is dependent on the Company's business model for managing the asset and the cash flow characteristics of the asset. On this basis, the Company may classify its financial instruments at amortised cost, fair value through profit or loss and at fair value through other comprehensive income.

All the Company's financial assets as at reporting period satisfy the conditions for classification at amortised cost under IFRS 9.

The Company's financial assets include trade receivables, other receivables, loans receivable from related parties and cash and cash equivalents.

i) Trade receivables

Trade receivables are measured at initial recognition at fair value and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in profit or loss when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.7 Financial instruments (continued)

Classification and measurement (continued)

Financial assets (continued)

i) Trade receivables (continued)

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss within operating expenses. When a trade receivable is uncollectable, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in profit or loss.

ii) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

Impairment of financial assets

Recognition of impairment provisions under IFRS 9 is based on the expected credit loss (ECL) model. The ECL model is applicable to financial assets classified at amortised cost and contract assets under IFRS 15 Revenue from Contracts with Customers.

The measurement of ECL reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes, time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date, about past events, current conditions and forecasts of future economic conditions.

The Company applies the simplified approach to determine impairment of receivables. The simplified approach requires expected lifetime losses to be recognized from initial recognition of the receivables. This involves determining the expected loss rates which is then applied to the gross carrying amount of the receivable to arrive at the loss allowance for the period.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the related financial assets and the amount of the loss is recognised in profit or loss.

Financial liabilities

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL . A financial liability is classified as held for trading if:

•It has been incurred principally for the purpose of repurchasing it in the near term ; or
• on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short -term profit- taking ; or
•it is a derivative that is not designated and effective as a hedging instrument .

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.7 Financial instruments (continued)

Classification and measurement (continued)

Financial liabilities (continued)

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

•such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise ; or

•the financial liability forms part of a financial asset or financial liability or both, which is managed, and its performance is evaluated on a fair value basis, in accordance with the documented risk management or investment strategy, and information is provided internally on that basis; or it forms part of a contract containing one or more embedded derivatives, and IAS 39 permits the entire combined contract to be designated as at FVTPL.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item.

i) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Where the terms of a financial liability are renegotiated and the entity issues equity instruments to a creditor to extinguish all or part of the liability (debt for equity swap), a gain or loss is recognised in profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instruments issued.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.7 Financial instruments (continued)

Classification and measurement (continued)

Financial liabilities (continued)

ii) Trade and other payables

Trade and other payables are subsequently measured at amortised cost using the effective interest

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Derecognition

Financial assets

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

Financial liabilities

The Company derecognises a financial liability when it is extinguished i.e. when the obligation specified in the contract is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised immediately in the statement of profit or loss.

Financial liabilities are derecognised when they have been redeemed or otherwise extinguished.

Substantial modification

A substantial modification of the terms of an existing debt instrument or part of it is accounted for as an extinguishment of the original debt instrument and the recognition of a new debt instrument. Gains or losses arising from the modification of the terms of a debt instrument are recognised immediately in profit or loss where the modification does not result in the derecognition of the existing instrument.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

As at the reporting period, there were no assets and liabilities off-set relating to financial instruments.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.7 Financial instruments (continued)

Offsetting financial instruments (continued)

The legally enforceable right is not contingent on future events and is enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

2.8 Property,plant and equipment

Buildings are initially recognised at cost and subsequently shown at fair value, based on valuations by external independent valuers, less accumulated depreciation. Valuations are performed every three years on buildings to ensure that the fair value does not differ materially from its carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

All other property, plant and equipment are initially stated at historical cost and subsequently measured at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred .

Increases in the carrying amount arising on revaluation of buildings are credited to other comprehensive income and shown as revaluation reserve in equity. Decreases that offset previous increases of the same asset are charged in other comprehensive income and debited against the revaluation reserve, all other decreases are charged to profit or loss. Each year the difference between depreciation based on the revalued carrying amount of the asset (the depreciation charged to profit or loss) and depreciation based on the asset's original cost is transferred from the revaluation reserve to retained earnings.

Depreciation on assets is calculated using the straight-line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives, as follows:

Buildings	2%
Equipment and furniture	20%
Motor vehicles	25%
IT equipment	33%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Property, plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Capital work in progress, which represents additions to property, plant and equipment that have not yet been brought into use, is not depreciated. Additions are transferred into the above depreciable asset classes once they are brought into use. Work in progress is measured at cost less impairments.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.8 Property,plant and equipment (continued)

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are included in profit or loss. When revalued assets are sold, the amounts included in the revaluation reserve relating to that asset are transferred to retained earnings.

2.9 Assets held for sale

Assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and investment property that are carried at fair value and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the asset to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset , but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the noncurrent asset is recognised at the date of derecognition.

Assets are not depreciated or amortised while they are classified as held for sale. Non-current assets are classified as held for sale in the statement of financial position.

2.10 Investment property

Investment property is property held to earn rental income or capital appreciation or for both, but not for sale in the ordinary course of business, use for the production or supply of goods or services or for administrative purposes. Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in the profit or loss.

Any gain or loss on the disposal of investment property (calculated as the difference between the net proceeds and the carrying amount of the item) is recognised in profit or loss. When investment property that was previously classified as property, plant and equipment is sold, any related amount that is included in the revaluation reserve is transferred to retained earnings.

2.11 Share capital

Ordinary shares are classified as share capital in equity. Any premium received over and above the par value of the shares is classified as share premium in equity. Incremental costs directly attributable to the issue of new ordinary shares are shown in equity as deduction from the proceeds.

2.12 Employee benefits

Employee benefits are all forms of consideration given in exchange for services rendered by employees or for the termination of employment. The classification, recognition and measurement of employee benefits is as follows;

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.12 Employee benefits (continued)

(i) Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service. The Company's short term employee benefits comprise remuneration in the form of salaries, wages, incentive bonuses, employee entitlement to leave pay and medical aid. The undiscounted amount of all short-term employee benefits expected to be paid in exchange for service rendered are recognised as an expense or as part of the cost of an asset during the period in which the employee renders the related service. The Company recognises the expected cost of incentive bonuses only when the Company has a present legal or constructive obligation to make such payment and a reliable estimate can be made.

(ii) Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits and short-term employee benefits).

Post-employment benefits comprise retirement benefits that are provided for employees through an independently administered defined contribution fund and by the National Pension Security Authority (NAPSA), which is also a defined contribution fund from the Company's perspective. Payments to the defined contribution fund and to the NAPSA scheme are recognised as an expense when they fall due, which is when the employee renders the service. The Company has no liability for post-employment retirement benefit funds once the current contributions have been paid at the time the employees render service. During the year, the Company contributed to the Company defined contribution fund and to the NAPSA scheme.

2.13 Income tax expense

(i) Current income tax

The tax credit for the period comprises current and deferred income tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of the tax enacted at the statement of financial position date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(ii) Deferred income tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the annual financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted at the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Notes to the annual financial statements (continued)

2 Summary of material accounting policies (continued)

2.13 Income tax expense (continued)

(ii) Deferred income tax (continued)

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

3 Critical accounting estimates and judgements

The preparation of annual financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also exercises judgement in applying the Company's accounting policies. This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be wrong.

Detailed information about each of these estimates and judgements is included together with information about the basis of calculation for each affected line item in the annual financial statements.

The estimates and assumptions that have significant risk causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below:

i) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period.

ii) Income taxes

Significant judgement is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The corporation recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

iii) Fair value of financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Company uses its judgement to make assumptions that are mainly based on market conditions existing at each reporting date.

Listed equities are valued based on their listed value (fair value) on 31 December 2022.

Unlisted equities are valued based on various valuation methods, including free cash flow, price earnings (PE) and net asset value (NAV) bases.

Notes to the annual financial statements (continued)

3 Critical accounting estimates and judgements (continued)

Judgements and assumptions in the valuations and impairments include determining the:

- Free cash flows of investees.
- Discount or premium applied to the IDC's stake in investee.
- Sector / subsector betas.
- Debt weighting - this is the target interest bearing debt level.

Refer to note to 13 (b) and 14 (b) for more details.

4 Financial risk management

This note explains the Company's exposure to financial risks and how these risks could affect the Company's future financial performance.

The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Company's risk management framework and governance structures are intended to provide comprehensive controls and ongoing management of its major risks. The Board of Directors exercises oversight through delegation from the Board to various sub-committees, notably the Audit and Risk Committee , which are organised in line with risk management policies.

a) Market risk

(i) *Foreign exchange risk exposure*

Foreign exchange risk arises when recognised assets or liabilities are denominated in a currency that is not the entity's functional currency.

The Company is exposed to foreign currency risk arising from various currency exposures, primarily with respect to the United States Dollar (USD).To manage foreign exchange risk, the Company holds fixed deposits with various banks which act as a natural hedge for foreign currency obligations. Hedging techniques such as currency swap are also used to manage currency risk.

Notes to the annual financial statements (continued)

4 Financial risk management (continued)

a) *Market risk (continued)*

The Company's exposure to foreign currency risk at the end of the reporting period, expressed in Zambian Kwacha is detailed in the table below.

	Exposure USD
As at 31 December 2022	
Financial assets :	
Cash and cash equivalents	**207**
Trade and other receivables	**53,674**
Loans due from related parties	**4,207,459**
	4,261,340
Financial liabilities :	
Trade and other payables	**(9,684)**
Borrowings	**(4,199,583)**
Net exposure	**52,073**
As at 31 December 2021	
Financial assets :	
Cash and cash equivalents	931
Trade and other receivables	62,896
Loans due from related parties	3,606,954
	3,670,781
Financial liabilities :	
Trade and other payables	(6,725)
Borrowings	(3,637,890)
Net exposure	26,166

The following significant rates have been applied during the year:

	Average rate		Reporting date	
	2022	2021	**2022**	2021
ZMW to 1 USD	**17.27**	16.81	**18.30**	19.90

Sensitivity

A strengthening (weakening) of the Kwacha by 10 percent, as indicated below against the USD would have increased /(decreased) equity and profit or loss by the amounts shown below. This computation is based on the foreign exchange rate variance that the company considered reasonably possible at the reporting date. The computation assumes all the other variables remain constant.

	Strengthening		Weakening	
	Profit/ loss	Equity	Profit/ loss	Equity
As at 31 December 2022				
USD	**5,207**	**5,207**	**(5,207)**	**(5,207)**
As at 31 December 2021				
USD	2,616	2,616	(2,616)	(2,616)

Notes to the annual financial statements (continued)

4 Financial risk management (continued)

a) *Market risk (continued)*

(ii) Cash flow and fair value Interest rate risk

The Company's main interest rate risk arises from long-term borrowings with variable rates, which expose the Company to cash flow interest rate risk.

The exposure of the Company's borrowings to interest rate changes at the end of the reporting period are as follows:

	2022	% of total loans	2021	% of total loans
Variable rate borrowings	366,627	100%	405,173	100%

The percentage of total loans shows the proportion of loans that are currently at variable rates in relation to the total amount of borrowings. None of the borrowings are referenced to a benchmark interest rate subject to interbank offered rates (IBOR) reform.

As at 31 December 2022, with all other variables held constant, a 2 % (2021: 2%) decrease/increase in the base interest rate would have resulted in change in post-tax profit for the year and shareholders' equity as follows:

	2022 K	2021 K
Impact on profit and equity	**(7,333)**	(8,103)

b) *Credit risk*

Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposure to customers, including outstanding receivables.

i) Risk management

For banks and financial institutions, the Company only engages reputable well-established financial institutions. The Company's risk control unit assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal ratings in accordance with limits set by the board. The compliance with credit limits by the customers is regularly monitored by line management.

ii) Impairment of financial assets

The Company has three types of financial assets that are subject to the expected credit loss model:

- Trade receivables and loan receivables
- Cash and cash equivalents

Notes to the annual financial statements (continued)

4 Financial risk management (continued)

b) *Credit risk (continued)*

ii) Impairment of financial assets (continued)

Trade receivables and loan receivables

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables and loan receivables. To measure the expected credit losses, receivables have been grouped based on shared credit risk characteristics and the days past due. The Company's historical credit loss experience does not show significantly different loss patterns for the various customer segments. Therefore, the grouping of trade receivables and loan receivables are not disaggregated into further risk profiles other than days past due.

The expected loss rates are based on the payment profiles or sales over a period of 36 months before 31 December 2022 and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

The outstanding receivables subjected to expected credit loss calculation are net of debtors where there is a legal right to offset.

There were no changes in the estimation techniques or significant assumptions made as at the reporting period. The amount that best represents the Company's maximum exposure to credit risk is the carrying value of its financial assets as presented in the statement of financial position.

On that basis, the loss allowance as at 31 December 2022 was determined as follows for trade receivables and loans due from related parties:

Trade receivables

2022	**Current**	**1 - 30 days past due**	**31 - 60 days past due**	**61 -90 days past due**	**Over 90 days past due**	**Total**
Gross carrying amount	-	8,866	4,181	3,832	102,481	119,360
Expected Loss rate	-	0%	0%	0%	75.65%	
Loss allowance	-	-	-	-	77,528	77,528
Amortised cost	**-**	**8,866**	**4,181**	**3,832**	**24,953**	**41,832**

2021	**Current**	**1 - 30 days past due**	**31 - 60 days past due**	**61 -90 days past due**	**Over 90 days past due**	**Total**
Gross carrying amount	-	8,866	4,181	3,832	86,588	103,467
Expected Loss rate	-	0%	0%	0%	89.54%	
Loss allowance	-	-	-	-	77,528	77,528
Amortised cost	**-**	**8,866**	**4,181**	**3,832**	**9,060**	**25,939**

4 Financial risk management (continued)

b) *Credit risk (continued)*

ii) Impairment of financial assets (continued)

Loan receivables

2022	Current	1 - 30 days past due	31 - 60 days past due	61 -90 days past due	Over 90 days past due	Total
Gross carrying amount	-	-	-	145,024	5,045,180	5,190,204
Expected Loss rate	-	0%	0%	1%	0.78%	
Loss allowance	-	-	-	-	39,311	39,311
Amortised cost	-	-	-	**145,024**	**5,005,869**	**5,150,893**

2021	Current	1 - 30 days past due	31 - 60 days past due	61 -90 days past due	Over 90 days past due	Total
Gross carrying amount	-	-	-	145,024	4,368,476	4,513,500
Expected Loss rate	-	0%	0%	1.00%	0.53%	
Loss allowance	-	-	-	1,450	18,334	19,784
Amortised cost	-	-	-	**143,574**	**4,350,142**	**4,493,716**

On that basis, the loss allowance as at 31 December on trade receivables and loan receivable was as follows:

	2022 K	2021 K
Trade receivable	77,528	77,528
Loan receivable	39,311	19,784
	116,839	**97,312**

The loss allowances for trade receivables and loan receivable as at 31 December 2022 reconcile to the opening loss allowances as follows:

	2022 K	2021 K
At the start of the year	97,312	41,868
Impairment charge- Loan receivable OCI	19,527	62
Impairment charge- Trade receivable	-	55,382
Net impairment charge (OCI)	19,527	55,444
At the end of the year	**116,839**	97,312

Trade receivables and loan receivable are written off where there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Company, and a failure to make contractual payments for a period of greater than 90 days past due.

4 Financial risk management (continued)

b) *Credit risk (continued)*

ii) Impairment of financial assets (continued)

Impairment losses on trade receivables and loan receivable are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

Cash and cash equivalents

While these balances are also subject to the impairment requirements of IFRS 9, the identified impairment loss was immaterial.

c) *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Prudent liquidity risk management includes maintaining sufficient cash coupled with the availability of funding from an adequate amount of committed credit facilities.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Management monitors rolling forecasts of the Company's liquidity reserve on the basis of expected cash flows. This maintains the level of its cash flow and cash equivalents and other highly marketable debt investments at an amount in excess of expected cash outflows on financial liabilities through cash flow forecasts.

The table below analyses the Company's financial liabilities that will be settled on a net basis into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table below are the contractual undiscounted cash flows and include estimated interest payments and exclude the impact of netting agreements.

4 Financial risk management (continued)

d) Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, issue new shares, or sell assets to reduce debt.

The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital is calculated as equity, as shown in the statement of financial position, plus net debt.

The capital structure consists of debt, which includes the borrowings (excluding derivative financial liabilities) disclosed in Note 21 cash and cash equivalents disclosed in Note 17,and equity as disclosed in the statement of financial position.

During 2022, the Company's strategy, which was unchanged from prior year, was to maintain a gearing ratio of less than 50%. The gearing ratios at 31 December 2022 and 31 December 2021 were as follows:

	2022	2021
Net debt (Note 25(b))	**(5,090,182)**	(4,470,378)
Total equity	**29,279,684**	28,128,553

11 Investment property (continued)

The Corporation's investment property relates to stand No. 7940 & 7941 (Kambendekela House) and, stand No. 6229 in Mongu (Teba House), Subdivision 1 of subdivision C10 Farm 748 Ndola, Subdivision 12 of Farm 748 Njo situated in Ndola, Subdivision 13 of subdivision B of Farm 748 Ndola, Plot No. 1029, Lusaka, Plot No. 1034, Lusaka and Plot No. 1033, Lusaka

The properties were independently valued by Fairworld Property Limited, a firm of Chartered Valuation Surveyors & Real Estate Agents at their market value as at December 31, 2022 .

The valuation assumptions used are summarized in the table below:

Valuation technique	Significant unobservable inputs	Inter- relationship between unobservable inputs and fair value measurement
This valuation method considers the present value of net cash flows to be generated from the property, taking into account expected rental growth rate, void periods, occupancy rate, lease incentive costs sum as rent free periods and other costs not paid by tenants. The expected net cash flows are discounted using risk adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary) tenant credit quality.	• Expected market rental growth (3 - 5%. Weighted average 4%) . • Void periods (average 6 months after the end of each lease). • Occupancy rate (80-90%, weighted average 80%). • Rent-free periods (1-month period on new leases) • Risk-adjusted discount rates (10% - 10.5%. weighted average 10%)	The estimated fair value would increase/(decrease) if : • Expected market rental growth were higher/(lower); • Void periods were shorter/(longer) ; • The occupany rate were higher/(lower) ; • Rent -free periods were shorter /(longer) ;or • The risk -adjusted discount rate were lower /(higher).

(b) Measurement of fair value

The company measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Level 1 : Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.

Level 2 : Inputs other than quoted prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Level 3 : Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which observable market prices exist, Black-Scholes and polynomial option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices volatiles and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

	Level 1	Level 2	Level 3	Total
At 31 December 2022				
Investments in subsidiaries	4,525,850	18,844,592	2,084,585	25,455,027
	4,525,850	**18,844,592**	**2,084,585**	**25,455,027**
At 31 December 2021				
Investments in subsidiaries	4,385,006	19,090,993	1,907,207	25,383,206
	4,385,006	19,090,993	1,907,207	25,383,206

Notes to the annual financial statements (continued)

13 Investments in subsidiaries (continued)

(b) Measurement of fair value (continued)

The following table shows the reconciliations from opening balances to closing balances of levels 1, 2 and 3 investments in subsidiaries:

	Level 1	Level 2	Level 3	Total
At the start of the year	4,385,006	19,090,993	1,907,207	25,383,206
Additions	-	279,669	-	279,669
Transfer from investment projects (Note 12)	-	105,327	-	105,327
Change in fair value	140,844	(631,397)	177,378	(313,175)
At the end of the year	**4,525,850**	**18,844,592**	**2,084,585**	**25,455,027**

As at 31 December 2022 the companies with fair value in excess of K100 million were sixteen (16) namely. Indeni Petroleum, Infratel Corporation Limited, Lusaka South Multi Facility Economic Zone, Nitrogen Chemicals of Zambia, Mulungushi Village, Mulungushi Conference Centre, Kawambwa Tea Industries Limited, ZESCO Limited, ZCCM-IH, Zambia Railways Limited, Zambia Cargo and Logistics, Zambia Forestry and Forest Industries Corporation, Zampalm Limited, Zambia Airways Limited, ZSIC General Insurance and ZSIC Life Insurance . These companies accounted for 99% of the reported fair value.

- ZCCM-IH PLC and ZAFFICO are listed on the Lusaka Securities Exchange. The fair value of IDC's equity investment is determined as the number of shares held as at the end of the year multiplied by the quoted market price per share;

- Infratel Corporation Limited, Lusaka South Multi Facility Economic Zone, Kawambwa Tea Industries Limited, Mulungushi Village Complex Limited, Mulungushi Conference Centre, Nitrogen Chemicals of Zambia, Zambia Railways, Zampalm Limited, ZESCO Limited, Zambia Cargo and Logistics, ZSIC Life and ZSIC General are determined using the discounted cashflow, relative valuation, analyst estimates, adjusted asset value and precedent transactions valuation methodology.

(b) Measurement of fair value (continued)

The assumptions used are summarized in the table below:

Name of subsidiary	Valuation technique	Significant unobservable inputs and assumptions	Inter- relationship between unobservable inputs and fair value measurement
Infratel Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Infratel Corporation Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) SD of between 56.0% and 84.0%, since Infratel is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, since IDC holds 100% of Infratel's issued share capital; c) a DLOM between 4.4% and 6.6%, since Infratel is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).
Mulungushi Village Complex Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on MVCL. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%, since MVCL is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, since IDC holds 100% of MVCL's issued share capital; and c) a DLOM between 4.4% and 6.6%, since MVCL is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher)

Notes to the annual financial statements (continued)

13 Investments in subsidiaries (continued)

(b) Measurement of fair value (continued)

Name of subsidiary	Valuation technique	Significant unobservable inputs and assumptions	Inter- relationship between unobservable inputs and fair value measurement
Mulungushi International Conference Centre	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on MICC. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%, since MICC is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, since IDC holds 100% of MICC's issued share capital; and c) a DLOM between 4.4% and 6.6%, since MICC is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher)
Zambia Railways Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Zambia Railways Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a)SD of between 21.6% and 32.4%, since ZRL is relatively smaller than the median of the peer sample across the key metric(s) applied. b)a CP between 17.6% and 26.4%, since IDC holds 100% of ZRL's issued share capital; and c)a DLOM between 5.0% and 7.6%, since ZRL is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher)

(b) Measurement of fair value (continued)

The assumptions used (continued)

Name of subsidiary	Valuation technique	Significant unobservable inputs and assumptions	Inter- relationship between unobservable inputs and fair value measurement
Kawambwa Tea Industries Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Kawambwa Tea Industries Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%%, since Kawambwa is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, since IDC holds 100% of Kawambwa's issued share capital; and c) a DLOM between 4.4% and 6.6%, since Kawambwa is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).
Zambia Cargo and Logistics	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on ZamCargo. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.6% and 9.6%, since ZamCargo is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, as IDC holds 100% of ZamCargo's share capital; and c) a DLOM between 4.4% and 6.6%, since ZamCargo is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).

13 Investments in subsidiaries (continued)

(b) Measurement of fair value (continued)

The assumptions used (continued)

Name of subsidiary	Valuation technique	Significant unobservable inputs and assumptions	Inter- relationship between unobservable inputs and fair value measurement
ZSIC General Insurance Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on ZSIC General Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a SD of between 6.4% and 9.6%, since ZSIC General is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, since IDC holds 100% of ZSIC General's issued share capital; and c) a DLOM between 4.4% and 6.6%, since ZSIC General is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).
ZSIC Life PLC	P-BV Relative Valuation P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on ZSIC Life PLC. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%, since ZSIC Life is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a CP between 15.9% and 23.9%, since IDC holds 100% of ZSIC Life's share capital; and c) a DLOM between 4.4% and 6.6%, since ZSIC Life is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).

(b) Measurement of fair value

The Company measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

	Level 1	Level 2	Level 3	Total
At 31 December 2022				
Investments in associates	1,186,890	1,420,318	286,821	2,894,029
	1,186,890	1,420,318	286,821	2,894,029
At 31 December 2021				
Investments in associates	721,154	1,067,635	166,067	1,954,856
	721,154	1,067,635	166,067	1,954,856

The following table shows the reconciliations from opening balances to closing balances of levels 1, 2 and 3 investments in associates:

	Level 1	Level 2	Level 3	Total
Balance at 1 January	721,154	1,067,635	166,067	1,954,856
Addition	-	3,760	501	4,261
Transfer	-	-	-	-
Change in fair value	465,736	348,923	120,253	934,912
Balance at 31 December	**1,186,890**	**1,420,318**	**286,821**	**2,894,029**

As at 31 December 2022 the companies with fair value in excess of K100 million were six (6) namely. Indo Zambia Bank Limited, ZANACO PLC , Kagem Limited, Lusaka Trust Hospital Limited, Zambia Industrial Commercial Bank Limited and Marcopolo Tiles Company.

• ZANACO is listed on the Lusaka Securities Exchange. The fair value of Company's equity investment is determined as the number of shares held as at the end of the year multiplied by the quoted market price per share.

The value of Indo Zambia Bank Limited,Marcopolo Tiles Company,Lusaka Trust Hospital Limited,Zambia Industrial Commercial Bank Limited and Kagem Limited are based on P-BV Relative Valuation and Adjusted NAV Results and EBITDA valuation methodology, see below for the assumptions used:

Notes to the annual financial statements (continued)

14 Investments in associates (continued)

(b) Measurement of fair value (continued)

The assumptions used

Name of associate	Valuation technique	Significant unobservable inputs and assumptions	Inter- relationship between key unobservable inputs and fair value measurements
Indo Zambia Bank Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Indo Zambia Bank Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) SD of between 6.4% and 9.6%, since IZB is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a DLOC between 8.6% and 12.8%, since IDC holds 40% of IZB's issued share capital; and c) a DLOM between 10.9% and 16.3%, since IZB is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).
Kagem Limited	EV-EBITDA Relative Valuation Results EV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Kagem Mining Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%, since Kagem is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a DLOC between 13.9% and 20.9%, since IDC holds 25% of Kagem's share capital; and c) a DLOM between 10.9% and 16.3%, since Kagem is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).

Notes to the annual financial statements (continued)

14 Investments in associates (continued)

(b) Measurement of fair value (continued)

The assumptions used (continued)

Name of associate	Valuation technique	Significant unobservable inputs and assumptions	Inter- relationship between key unobservable inputs and fair value measurements
Marcopolo Tiles	EV-EBITDA Valuation Results EV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Marcopolo Tiles Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%, since Marcopolo is relatively smaller than the median of the peer sample across the key metric(s) applied; b) a minority discount between 13.9% and 20.9%, since IDC holds 22.60% of Marcopolo's issued share capital; and c) a LM discount between 13.2% and 19.8%, since Marcopolo is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).
Lusaka Trust Hospital Limited	P-BV Relative Valuation and Adjusted NAV Results P-BV makes use of a peer group of comparable publicly listed companies to derive valuation metrics that was applied on Lusaka Trust Hospital Limited. The market multiples method is built upon the premise that peer companies provide a relevant reference point for valuing a given target because they share key business and financial characteristics, performance drivers, and risks.	a) a SD of between 6.4% and 9.6%, since LTH is relatively smaller than the median of the peer sample across the key metric(s) applied. b) a DLOC between 9.0% and 13.4%, since IDC holds 45% of LTH's issued share capital; and c) a DLOM between 10.5% and 15.7%, since LTH is a privately held company.	The estimated fair value would increase/(decrease) if: •Adjusted peer group multiple was higher/(lower) •Control premium was higher/(lower) •Marketability discount was lower/ (higher).

At the end of the year	14,460,036	12,024,457	7,901	26,492,394

i) Capital reserve

The capital reserve represents the net assets value of State-Owned Enterprises (SOE) transferred by the Government of the Republic of Zambia through the Minister of Finance pursuant to the Minister of Finance (Incorporation) Act Cap 349 of the Laws of Zambia to the Company and subsequent capital raised from non-operating activities. K1.38 billion relates to capital injection in form of government bonds from the Ministry of Finance to the Company (2021 K156.41 million relates to transfer of net assets of Kawambwa Tea Company to the Company from the Ministry of Finance).

ii) Fair value reserve

The fair value reserve contains fair value movements from the valuation of the investment in subsidiaries and investment in associates which are held at fair value through other comprehensive income.

iii) Revaluation reserve

Items of property, plant and equipment are recognised at fair value based on periodic, but at least triennial, valuations by external independent valuers, less subsequent depreciation. The fair value of property, plant and equipment was revalued on 31 December 2022 by Sherwood Greene an external, independent valuer. The reserves are non-distributable to the shareholders and are recognised net of deferred income tax.
